How to Enable Browser Notifications

This guide explains how to enable browser notifications in Microsoft Edge and Google Chrome, and how to turn on Windows notifications from the taskbar.

Part 1 - Microsoft Edge

1. Open Microsoft Edge.
2. Type `edge://settings/content/notifications` in the address bar.
3. Turn on 'Ask before sending (recommended)'.
4. If your site is blocked, change it to Allow.
5. Refresh the website and click Allow.

Part 2 - Google Chrome

1. Open Google Chrome.
2. Type `chrome://settings/content/notifications` in the address bar.
3. Turn on 'Sites can ask to send notifications'.
4. Remove the site from 'Not allowed' or change it to Allow.
5. Refresh the website and click Allow.

Part 3 - Turn On Windows Notifications (Bell Icon)

1. Click the Start button and open Settings.
2. Select System.
3. Click Notifications.
4. Turn ON Notifications.
5. Verify the notification icon appears in the lower-right corner of the taskbar.
6. If you do not receive alerts, make sure Focus Assist / Do Not Disturb is turned off.

How to Enable Browser Notifications

Microsoft Edge & Google Chrome (Step-by-Step Guide for Beginners)

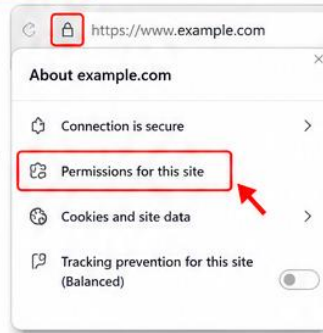

Browser notifications allow websites to send you updates and alerts on your desktop or device. Follow the steps below to enable notifications in Microsoft Edge and Google Chrome.

PART 1: MICROSOFT EDGE

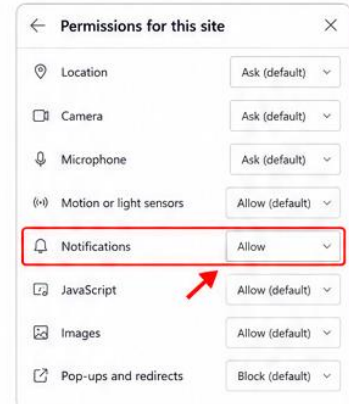

1 Open Site Settings

1. Open Microsoft Edge.
2. Click the lock icon (🔒) next to the website address in the address bar.
3. Click **Permissions for this site**.

2 Allow Notifications

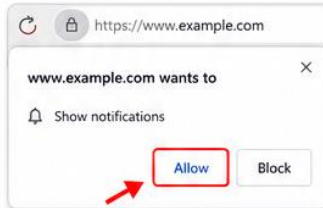

1. In the Permissions panel, find **Notifications**.
2. Change the setting from **Block** to **Allow**.

3 Refresh the Page

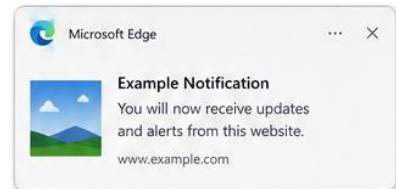

Refresh (press F5) the website. You may see a pop-up asking to show notifications.

Click **Allow**.

4 You're All Set!

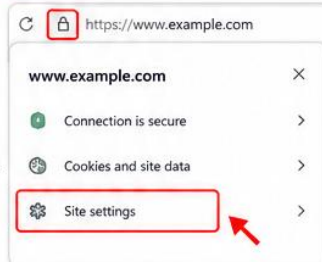

Notifications are now enabled. You will receive alerts from this website.

PART 2: GOOGLE CHROME

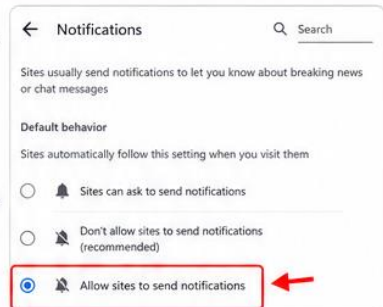

1 Open Site Settings

1. Open Google Chrome.
2. Click the lock icon (🔒) next to the website address in the address bar.
3. Click **Site settings**.

2 Allow Notifications

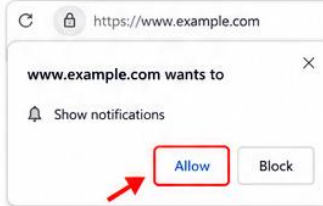

1. In the Site settings page, click **Notifications**.
2. Change the setting from **Don't allow sites to send notifications** to **Allow**.

3 Refresh the Page

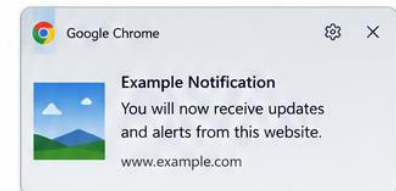

Refresh (press F5) the website. You will see a pop-up asking to show notifications.

Click **Allow**.

4 You're All Set!

Notifications are now enabled. You will receive alerts from this website.

TROUBLESHOOTING TIPS

- If you blocked notifications by mistake, follow the steps above and change the setting to Allow.
- Make sure your device notification settings are ON.
- Check Do Not Disturb / Focus Assist – it may be hiding notifications.
- If you still don't see notifications, try restarting your browser or computer.

Need more help?

Contact your IT support or visit the browser's help center.

Part 3 - Turn On Windows Notifications (Bell Icon)

The notification bell (Action Center/Notification Center) in the bottom-right corner of Windows displays application alerts and system notifications.

Follow these steps:

1. Click the Start button and open Settings.
2. Select System.
3. Click Notifications.
4. Turn ON Notifications.
5. Verify the notification icon appears in the lower-right corner of the taskbar.
6. If you do not receive alerts, make sure Focus Assist / Do Not Disturb is turned off.

PART 3: TURN ON WINDOWS BELL NOTIFICATION (ACTION CENTER)

The bell icon in the bottom right corner (Action Center) shows notifications and quick settings. Follow the steps below to turn it on.

1 Open Settings

Click the **Start** button (Windows icon) and then click the **Settings** (gear) icon.

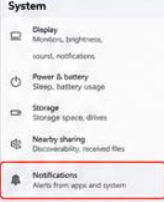

2 Go to System

In Settings, click **System**.

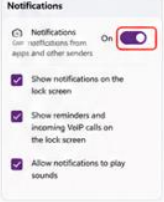

3 Open Notifications

In the left menu, click **Notifications**.

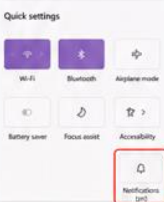

4 Turn On Notifications

Turn on the **Notifications** toggle at the top.

5 Turn On the Bell (Action Center)

Make sure the **Action Center** (bell icon) is turned on.

You should now see the bell icon in the bottom right corner of your taskbar.

TROUBLESHOOTING TIPS

- If you blocked notifications by mistake, follow the steps above and change the setting to **Allow**.
- Make sure your device notification settings are turned **ON**.
- Check **Do Not Disturb** / **Focus Assist** – it may be hiding notifications.
- If you still don't see notifications, try restarting your browser or computer.

Need more help?

Contact your IT support or visit the browser's help center.

Troubleshooting

- Make sure Windows Notifications are turned on.
- Turn off Focus Assist / Do Not Disturb.
- Restart the browser after changing notification settings.
- Refresh the website and click Allow when prompted.
